Guide to the Interpretation of Course Evaluations at UT Austin

The goal of course evaluation process at UT Austin is to drive teaching excellence and to support continuous improvement in teaching and learning experiences. The two sets of scales used for core evaluation questions and the associated weights are:

Strongly Agree (5)

Agree (4)

Neutral (3)

Disagree (2)

Strongly Disagree (1)

Excellent (5)

Very Good (4)

Satisfactory (3)

Unsatisfactory (2)

Very Unsatisfactory (1)

The Mean is calculated by adding all of the weights for a single question and dividing by the number of respondents. The course workload question is not averaged.

The number of students (e.g. respondents) marking each option is reported for each of the items. These frequency distributions provide information about the level of student ratings and the spread and shape of the class distribution of responses. The distributions thus provide a picture of student perception of a course.

Course evaluations provide snapshots of student perspectives on their course-level learning experiences. Most experts on teaching evaluation advise that no individual method gives the complete picture of an instructor's teaching effectiveness; multiple and diverse measures, on multiple occasions, are advised to give a full picture of the teaching effectiveness of a particular instructor. Moreover, other factors, such as size of class, level of the class, and content of the course, can cause small variations in the ratings. Therefore, student perspectives for a particular instructor or course should be interpreted as a snapshot, and not as providing complete information on the teaching effectiveness of that instructor.

Teaching Assistant Questions

The TA was available to help me as needed.

Statistics

Value

Mean

4.10

I felt the TA was approachable.

Statistics

Value

Mean

4.00

The TA explained course concepts, subject matter, or other course-related topics in a way that helped me learn.

Statistics

Value

Mean

4.20

The TA was able to address most of my questions related to the course concepts, subject -matter, or topics.

Mean

4.20

Comment Questions

Identify aspects of your interactions with your teaching assistant that were most effective in helping your learning.

Comments
There is a lack of consistency in grading assignments and exams.

What is one thing the teaching assistant could do differently to help improve future students' learning in this course?

Comments
Fire him.
I write the same response for both TAs, as I am not able to differentiate who graded what. I think, in general, the TAs for this course have been aberrantly poor with communicating results about grading (e.g., explaining why points were taken off), had unclear, slipshod standards in criteria, and at times were excessively pedantic. I believe the regrade request functionality in GradeScope should be available so that they can clarify points. I was also repeatedly frustrated by the fact that points were taken off even when I closely followed the notations given in answer keys for prior problem sets.
