Guide to the Interpretation of Course Evaluations at UT Austin

The goal of course evaluation process at UT Austin is to drive teaching excellence and to support continuous improvement in teaching and learning experiences. Course evaluations provide snapshots of student perspectives on their course-level learning experiences. Most experts on teaching evaluation advise that no individual method gives the complete picture of an instructor's teaching effectiveness, multiple and diverse measures, on multiple occasions, are advised to give a full picture of the teaching effectiveness of a particular instructor. Moreover, other factors, such as size of class, level of the class, and content of the course, can cause small variations in the ratings. Therefore, student perspectives for a particular instructor or course should be interpreted as a snapshot, and not as providing complete information on the teaching effectiveness of that instructor. For additional details, including the scales and how the Mean scores are calculated, please review the Report Guide at the end of this document or, [UT Austin's Viewing Course Evaluation Results webpage](#).

Creation Date: **Friday, August 22, 2025**

Core Questions

	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	Responded	Mean
During this course, I gained a deeper understanding of the subject matter.	10.7%	50.0%	14.3%	25.0%	0.0%	28	3.46
The course was well organized.	21.4%	42.9%	17.9%	14.3%	3.6%	28	3.64
The instructor clearly explained the course objectives and expectations.	32.1%	42.9%	17.9%	3.6%	3.6%	28	3.96
The instructor fostered an inclusive learning environment.	32.1%	39.3%	21.4%	3.6%	3.6%	28	3.93
The instructor effectively explained the concepts and subject matter in this course.	17.9%	50.0%	14.3%	10.7%	7.1%	28	3.61
The instructional techniques kept me engaged in learning.	17.9%	32.1%	28.6%	7.1%	14.3%	28	3.32
The instructor checked for student understanding of the concepts presented in the course.	21.4%	53.6%	14.3%	7.1%	3.6%	28	3.82

Overall Questions

	Excellent	Very Good	Satisfactory	Unsatisfactory	Very Unsatisfactory	Responded	Mean
Overall, this instructor was	25.0%	32.1%	25.0%	14.3%	3.6%	28	3.61
Overall, this course was	17.9%	10.7%	46.4%	17.9%	7.1%	28	3.14

Other Course Questions

Comment Questions

Identify aspects of the course that were the most effective in helping your learning.

Comments
Video lecture recordings
The examples
The lectures, while I sometimes had difficulty focusing, it was helpful in visually showing aspects of the mathematics/theory.
being able to reread stuff at my own pace
clearly outlined canvas page
Practice problems, and previous semesters test material
The instructor did provide a course schedule that had a timeline of when to start each lecture video which did help stay on top of the course load.
All the practice exam and how to solve practice question made me know how I need to solve my problems on test and gave me a better understanding of what the expect.
The past tests
The quizzes acted like homework because there was an incentive to do them more than any of the homework uploaded. The instapolls helped me stay engaged during the long lectures. I definitely could've studied more, so a lot of it was on me. It just wasn't easy to practice recall when the only good bits of information were from 1+ hr lectures and confusing slides.
The communication from Mr. Yu was essential in trying to understand this course, he helped massively with his very responsive emailing.
Clear instructions and multiple modes of learning made this class fantastic.
barely anything
N/A
Having the slideshows and practice problems available
my own ability to read a textbook and do practice problems

Identify the aspect of the course that you found most challenging, why you found it was challenging, and suggest one thing that could be done to help future students meet that challenge more effectively.

Comments
The practice exams should be tailored the same way the midterms are, to give familiarity and a deeper understanding of what's expected
The tests were hard, and the reviews wouldn't really help
The homework was frequent and definitely challenging in a manner. Though I'm not sure how a better method of going about it more effectively can be considered.
Having it be on your own
I felt no matter how much i studied, practiced, watched hours of lectures, go through previous tests, The test would have problems formatted very oddly and just completely out of left field. I think providing problems similar to those on test would be helpful.
The exams were too difficult. There was a large jump in difficulty from the homework to the exams, and the majority of the class felt that we did not have enough time to finish each exam. They were open note which would have been helpful if there was even enough time to open your notes. I was forced to leave questions blank on the exams not because I didn't understand them but because I did not have enough time to even reach them.
The lecture videos with the instapolls sometimes felt unnecessarily long
I found the last 2 quizzes challenging they where also super long so maybe breaking each of the 2 quizzes in half.
The tests themselves
The lectures are way too long. And I know this class was asynchronous, but moving forward, I think this class should be synchronous or in person. Long lectures with no incentive to do them, except for a few instapolls, are a disaster.
I think just the overall course material. There is a lot of stuff to learn in a pretty condensed amount of time that makes it challenging to try and truly understand what we are learning.
deviating from the schedule was entirely too easy but that's a personal burden
being online
Tests NOTHING like the material taught, no way to possibly study using practice exams
The speed of the course and the inability to see whether you got answers on Instapolls and Quizes correct. They should show the right answer afterwards at least after the due date passes.
this ladies lecture videos are awful for the most part
I found it most challenging to follow along with the lectures as it felt quite confusing and difficult

College, School, or Unit Questions

Report Guide

Guide to the Interpretation of Course Evaluations at UT Austin

The goal of course evaluation process at UT Austin is to drive teaching excellence and to support continuous improvement in teaching and learning experiences. The two sets of scales used for core evaluation questions and the associated weights are:

Strongly Agree (5)
Agree (4)
Neutral (3)
Disagree (2)
Strongly Disagree (1)

Excellent (5)
Very Good (4)
Satisfactory (3)
Unsatisfactory (2)
Very Unsatisfactory (1)

The Mean is calculated by adding all of the weights for a single question and dividing by the number of respondents. The course workload question is not averaged.

The number of students (e.g. respondents) marking each option is reported for each of the items. These frequency distributions provide information about the level of student ratings and the spread and shape of the class distribution of responses. The distributions thus provide a picture of student perception of a course.

Course evaluations provide snapshots of student perspectives on their course-level learning experiences. Most experts on teaching evaluation advise that no individual method gives the complete picture of an instructor's teaching effectiveness; multiple and diverse measures, on multiple occasions, are advised to give a full picture of the teaching effectiveness of a particular instructor. Moreover, other factors, such as size of class, level of the class, and content of the course, can cause small variations in the ratings. Therefore, student perspectives for a particular instructor or course should be interpreted as a snapshot, and not as providing complete information on the teaching effectiveness of that instructor.
